Keywords: Breast cancer, Food, Nutrition.
There is a long and rich history of government public health efforts to educate and inform the public about nutrition and healthy eating. The first daily food guide, published in 1916, paved the way for a host of scientific documents, reports, brochures, symbols, and educational campaigns, including the Basic Seven Foods, the Food Guide Pyramid, and the Nutrition Facts panel. As a result of efforts such as these, Americans today have access to more information about nutrition than any previous generation. And yet the nation is facing a crisis of obesity and diet-related chronic diseases. Although there are many factors that influence what and how Americans eat, it is clear that there is a disconnect between dietary recommendations and actual consumption. Most of the front-of-package (FOP) systems that have been developed to date follow in the tradition of providing consumers with nutrition information. The use of such systems implicitly assumes that consumers are receiving appropriate nutrition information, whose impact can be enhanced by making it more prominent (i.e., putting it on the front of packages) and by delivering it more concisely. After reviewing evidence and perspectives from a wide range of disciplines, the committee came to a different conclusion.

The National Technical Reports Library (NTRL) enhances accessibility to the NTIS technical reports collection. It provides access to:
- Bibliographic records of more than 2,000,000 technical reports
- Downloadable full text of 700,000 of these reports in PDF format

Subscription rates are based on institutional FTE levels.

The NTRL operates on a system interface that allows users to do queries on the large NTIS bibliographic database. The intent is to broadly expand and improve access to over 2 million bibliographic records (pre-1960 to present) and 700k full-text documents in PDF format that are directly linked to that bibliographic database.

For more information, go to: http://www.ntis.gov/products/ntrl/

NTIS e-Alerts
Every week, NTIS receives more than 1,000 publications, studies and valuable data from over 350 U.S. government agencies and international sources. This information is the result of billions of dollars of R&D and studies sponsored by the United States Government.

NTIS eAlerts, delivers summaries of these publications right to your desktop, bi-weekly, in your field of interest. For more information visit http://www.ntis.gov/products/alerts/
