**FEDERAL LABORATORY CONSORTIUM FOR TECHNOLOGY TRANSFER**

**FLC** *advancing federal research and technology*

The Federal Laboratory Consortium for Technology Transfer (FLC) and the National Technical Information Service (NTIS) continuously collaborate on the process of Federal Technology Transfer.

The FLC is the nationwide network of federal laboratories that provides the forum to develop strategies and opportunities for linking laboratory mission technologies and expertise with the marketplace. The FLC consists of more than 250 federal laboratories.

As an agency of the U.S. Department of Commerce, the NTIS mission is to provide for the acquisition, archiving and dissemination of technological, scientific, and engineering information. Much of this permanent repository of information is the result of research conducted by federal laboratories that are members of the FLC. The collaborative effort of the FLC and NTIS ensures the perpetual availability of this vital research to American businesses and industries.

## NTRL INCREASES ACCESS TO FEDERAL S&T REPORTS

NTIS has launched greater access to federally funded science & technology information and reports. Starting in October 2014, U.S. citizens have free access to all electronically-available documents in the NTIS collection.

Currently there are more than 850,000 documents digitized for free public access. For the first time, Individuals have the option to subscribe to the NTRL in order to benefit from the Premium features of the database, such as advanced search, more free downloads, and digitization-on-demand (NTRL Premium Institutional).

Please feel free to contact me if you have any questions.

## CENDI (Commerce, Energy, NASA, Defense Information Managers Group)

CENDI (Commerce, Energy, NASA, Defense Information Managers Group) is an interagency group of senior Scientific and Technical Information (STI) managers from 14 United States federal agencies.

CENDI traces its roots to the Committee on Scientific and Technical Information (COSATI) of the Federal Council on Science and Technology. COSATI was established in the early 1960s to coordinate the management of the results from the U.S. government's increasing commitment to scientific research and technology development. The scientific and technical information (STI) managers of the government's major research and development (R&D) agencies worked within COSATI to standardize guidelines for cataloging and indexing technical reports. COSATI ceased formal operations in the early 1970s.

To continue the cooperation begun under COSATI, managers of agency STI programs from Commerce (National Technical Information Service), Energy (Office of Scientific and Technical Information), NASA (HQ/STI Division), and Defense (Defense Technical Information Center) began meeting periodically to discuss common topics and stimulate more effective cooperation.

In 1985, a Memorandum of Understanding was signed by the four charter agencies and CENDI was established. From this small core of STI managers, CENDI has grown to its current membership, which represents the major science agencies, the national libraries, and agencies involved in the dissemination and long-term management of scientific and technical information.

## Public Access Plans of U.S. Federal Agencies

*Additional Public Access Plans will be posted as agencies release them.*

In a memo released by the Office of Science and Technology Policy (OSTP) on February 22, 2013, each Federal agency with over \$100 million in annual conduct of research and development expenditures was directed to develop a plan to support increased public access to the results of research funded by the Federal Government. This included any results published in peer-reviewed scholarly publications that are based on research that directly arises from Federal funds, as defined in relevant OMB circulars (e.g., A-21 and A-11).

The full memo can be viewed at <https://www2.icsu-wds.org/files/ostp-public-access-memo-2013.pdf>.

Some agencies not subject to the OSTP memo are voluntarily developing Public Access Plans and are included below.

**Comfort, Indoor Air Quality, and Energy Consumption in Low Energy Homes. National Renewable Energy Lab., Golden, CO.**

A home with an optimized building envelope, including enhanced insulated walls, high-efficiency windows, and airtight construction, can achieve very low energy consumption, foremost in cold climates.

These measures also have a substantial impact on indoor conditions, notably occupant comfort in winter and indoor air quality (IAQ). Specifically, high insulation levels produce indoor surface temperatures close to the indoor air temperature, increasing the mean radiant temperature in winter and (to a lesser extent) decreasing it in summer. Airtight construction prevents uncontrolled ventilation heat losses and protects the building structure, but creates the need for mechanical ventilation to ensure sufficient outdoor air supply. A marketing claim frequently made about high performance homes is that, in addition to being extremely energy efficient, they offer increased comfort and IAQ, and are thus healthier than conventional homes.

This study investigates whether these claims can be supported by measured field data. This report documents the results of an in-depth evaluation of thermal comfort for two potential net zero-energy homes (NZEHS) in Massachusetts. We also present the results of an IAQ evaluation that was part of a larger study done in conjunction with Lawrence Berkeley National Laboratory (LBNL).

**NTRL**

NATIONAL TECHNICAL REPORTS LIBRARY  
U.S. Department of Commerce

**The National Technical Reports Library (NTRL) enhances accessibility to the NTIS technical reports collection. It provides access to:**

- Bibliographic records of more than 2,500,000 technical reports
- Downloadable full text of 850,000 of these reports in PDF format

Subscription rates are based on the number of IP's.

The NTRL operates on a system interface that allows users to do queries on the large NTIS bibliographic database. The intent is to broadly expand and improve access to over 2 million bibliographic records (pre-1960 to present) and 800k full-text documents in PDF format that are directly linked to that bibliographic database.

For more information, go to:

\*\* Quantities represent each new report assigned on average to 3-5 categories.

**Just Revised: the NTIS Database Search Guide**

Gain an in-depth understanding of the NTIS database structure with this new guide:

- Comprehensive list of NTIS Categories
- Helpful information and search hints
- Reference Guide to online commercial services and the NTRL
- Great Reference Manual & Teaching Tool

**Subject Category Codes/Classification**

NTIS classifies citations into 39 subject categories. Each of these subject categories is divided into subcategories. This method provides sorting categories for both hard and soft sciences. All subject categories consist of three character codes: two numerics and one alpha character. The numeric codes represent entire categories the alpha codes are used to designate subcategories within these broad categories. The number of NTIS subcategories posted to an information product average from three to five, although there are some reports with more.

Any of the technical reports listed in this newsletter can be ordered directly from the National Technical Information Service, simply click on the title to go to the product detail page on NTIS.GOV.

If your organization is a subscriber to the National Technical Reports Library, most of the reports listed can be downloaded free there. For information on how to subscribe to NTRL, go to <http://www.ntis.gov/products/ntrl/>.

## Title Index - For NTRL Users

The following is a list of the titles included in this month's issue, without links to the NTIS Web site. The list is in alphabetical order by title.

NTIS Number	Category	Title
PB2013111528	68	Air Quality 2013, Volume 1. Transportation Research Record: Journal of the Transportation Research Board, No. 2340.
PB2014101651	68	Air Quality 2013, Volume 2. Transportation Research Record: Journal of the Transportation Research Board, No. 2341.
PB2013110047	68	Air Quality Modeling Technical Support Document: Proposed Tier 3 Emission Standards, March 2013.
PB2013106512	68	Air Quality Modeling Technical Support Documents: Proposed Tier 3 Emission Standards.
PB2014102083	68	Air Quality Overview, North Cascades National Park Complex.
DE131095437	68	Atmospheric Aerosol Chemistry, Climate Change, and Air Quality, An EMSL Science Theme Advisory Panel Workshop.
N140000090	95	Catalytic Converters Maintain Air Quality in Mines.
DE20131067942	97	Comfort, Indoor Air Quality, and Energy Consumption in Low Energy Homes.
PB2013106513	68	Emissions Inventory for Air Quality Modeling Technical Support Document: Proposed Tier 3 Emissions Standards.
PB2013103792	68	Indoor Air Quality Analysis of Commercial Reference Buildings.
PB2013110078	55	Meteorological and Wave Measurements for Improving Meteorological and Air Quality Modeling.
PB2014102204	68	Natural Resource Condition Assessment for Sequoia and Kings Canyon National Parks. Appendix 2. Air Quality.
ADA606680	48	New Tools for Estimating and Managing Local/Regional Air Quality Impacts of Prescribed Burns.
PB2013110648	48	NIOSH Ventilation Research Addressing Diesel Emissions and Other Air Quality Issues in Nonmetal Mines.
DE131095662	97	Optimization of Ventilation Energy Demands and Indoor Air Quality in the ZEBRAAlliance Homes.
PB2013110040	68	Quality Assurance Handbook for Air Pollution Measurement Systems. Volume 2: Ambient Air Quality Monitoring Program, May 2013.
PB2014100439	85	Re-Evaluation of Montana's Air Quality Program.
ADA607657	89	Technical Guide for Indoor Air Quality Surveys.
PB2013108262	68	Transportation Conformity Notice of Proposed Rulemaking: Conformity Amendments for the New 8-hour Ozone and PM(2.5) National Ambient Air Quality Standards.
N140004415	95	Use Of The Operational Air Quality Monitor (AQM) For In-Flight Water Testing Project.
