

Knowledge Management Solutions, Inc.

Design, develop and deliver performance improvement programs that produce results for significantly less than competitive solutions.

KMx Enterprise is an Advanced Distributed Learning Platform that provides fully integrated learning management, learning content management, content development and live presentation technologies in one easy to use solution.

KMx components can be licensed separately to provide stand-alone learning management or support third-party learning management systems with our robust e-learning development and content management capabilities.

Figure (1) - KMx supports all delivery methods and blends of training and performance support

KMx provides an integrated environment for developing, managing, and delivering training, performance support and documentation. The student interface was designed for easy customization and branding and is available with language packs to provide for localization and multilingual distribution. Figure (1) illustrates the ability of **KMx** to support online, offline and blended delivery methods including all popular instructor facilitated and self-study models.

Human Performance Management and Administration

As illustrated below, **KMx** was designed to provide a total development, management and delivery solution. Our innovative design virtually eliminates costly integration and startup expenses.

Analysis	Design	Development	Delivery	Evaluation	Performance
<ul style="list-style-type: none"> Determine Required Behaviors Develop Performance Objectives 	<ul style="list-style-type: none"> Create Personnel Categories Develop Test Items and Performance Measures 	<ul style="list-style-type: none"> Assemble Course Content and Testing Materials Publish Courses in Numerous Output Formats 	<ul style="list-style-type: none"> Schedule & Administer Classes Provide Class Activities & Assignments 	<ul style="list-style-type: none"> Generate Numerous Reports and Downloads Evaluate Objective Performance & Impacts 	<ul style="list-style-type: none"> Manage Personnel and Facility Resources Reuse, Re-deploy and Manage Content

Knowledge Management Solutions, Inc.

KMx will enable you to quickly train employees, partners, suppliers and customers with the latest information at a much lower cost than any other enterprise learning development or delivery platform.

“KMSI is revolutionizing e-learning and is positioned to be the leader in the corporate e-learning space through delivering superior technology with measurable, high return on investment for its clients”

**Duke Essiam, Head of Equity Financing
IPA Advisory & Intermediary Services, LLC**

E-Learning Development and Course Conversion Technology

KMx includes student registration, embedded development tools, live web-cast capability and robust reporting. Users only need an Internet connection and a browser to access courses. Course developers can use our development environment to instantly create new programs that can include presentations, video, audio, animations, images, assessments, surveys, collaborations, and documentation.

KMx is a globally scalable Tiered Enterprise Class Web-Application built using MS .Net and MS SQL Server 2000. The architecture is based on the Shareable Content Object Reference Model (SCORM). KMx is accessible using standard desktop applications and browser technologies and supports popular learning, content and document management technologies. KMx can be installed on a local server in a few hours without wasting time and money bogged down in long, expensive implementation cycles or we can host it for you.

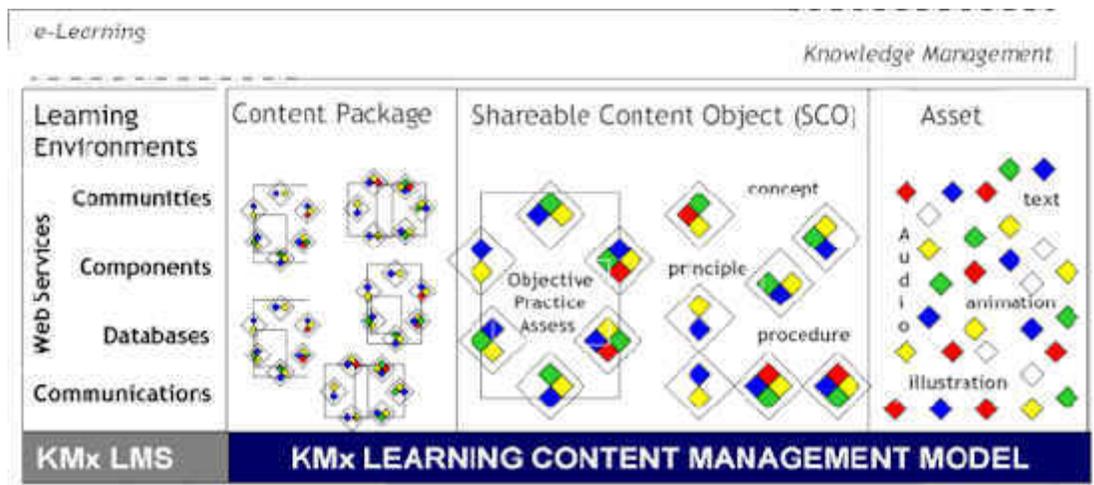

Create compelling programs using:

- animations
- slide presentations
- videos
- audio
- references
- spreadsheets
- pictures
- external URLs
- third-party content
- SCORM packages
- exams
- interactivity

and much more...

Learning Content Management and Standards Conformance

KMx provides a highly granular and reusable content management architecture that implements all SCORM requirements, including support of the SCORM Application Program Interface (API) and the SCORM Data Model. KMx provides fully automated processing of SCORM Content Packages providing the capability of importing and exporting without user intervention.
