DMFMAN: Customer Driven Online Manual Matching – Annual Subscription - 1 User Plus Queries Level

Use Manual Batch Processing if you need to check a large list of numbers occasionally, for example, to check voter registration lists before an election. You could get a subscription for x number of queries each year to check your list. Don't use Manual Batch Processing to check large lists repeatedly, nor to check just a few numbers at a time.

The fund could run a list of the recipients weekly or monthly. Don't use Automated Batch Processing if you don't need to run the same numbers repeatedly, nor to run searches a couple of times a year, nor to check a few numbers at a time.

Don't use Web Service if you won't write your own integration programs and don't need to automate SSN checking with an existing program.
